

## LIFEPAK® CR2 Defibrillator

### LIFEPAK CR2 Defibrillator with LIFELINKcentral™ AED Program Manager vs. Cardiac Science Powerheart® G5 AED

Physio-Control is the pioneer in defibrillation technology with more than 60 years of experience. Our complete and connected AED response system is expertly designed for user confidence. The intuitive CR2 integrates advanced technology that enables heart rhythm analysis while CPR is performed. And LIFELINKcentral™ AED Program Manager monitors each AED every single day, sending alerts via cellular network or Wi-Fi® about anything that may affect a unit's readiness—all automatically. This means our customers can readily overcome the most difficult challenges of an AED program with a single, connected system. Here is a side-by-side comparison with the Cardiac Science Powerheart G5 AED.

LIFEPAK CR2 Debrillator with LIFELINKcentral AED Program Manager

Cardiac Science Powerheart G5 AED

#### Connected. Ready.

Connection to an AED program management system via Wi-Fi or cellular network	Yes	No
Automatic tracking of AED location via the cellular network	Yes	No
Wireless monitoring of battery charge and self-tests through an AED program management system to ensure readiness	Yes	No
Email notification of device in use, including location and time	Yes	No
Wi-Fi transmission of event data to arriving emergency responders	Yes	No
Automatic distribution of AED event reports to professional caregivers	Yes (optional)	No
Wireless software upgrades	Yes	No

#### Continuous high-quality CPR

Analysis during chest compressions shortens or eliminates pauses, to maximise hands-on time	Yes	No
Metronome and CPR coaching to audibly guide users in performing effective compression rate and depth	Yes <sup>3</sup>	Yes <sup>1</sup>
Integrated CPR feedback using only the pads, without the use of an accelerometer	Yes	No

#### Designed for user confidence

Bold and simple graphics help users focus on one task at a time	Yes	No
Time to shock from the end of CPR interval	Less than 7 seconds for a 360J shock (with cprINSIGHT™ technology)	Typically 15 seconds, including rhythm analysis <sup>1</sup>
Side-by-side electrodes without a liner to minimise confusion	Yes	No
Detection of background noise and automatic volume adjustment to ensure instructions are audible	Yes	No
Optional dual language capability for use in multilingual communities	Yes, toggle between two pre-set languages	Yes, toggle between two pre-set languages <sup>1</sup>
High IP rating for protection against water and dust	Yes, IP55	Yes, IP55 <sup>1</sup>
Child mode button for quick access to reduced energy	Yes	No
Escalating biphasic full energy for difficult-to-defibrillate patients	Yes, 150–360J	Yes, 95-354J <sup>1</sup>

Cardiac Science will say the Powerheart G5 AED's Rescue Ready technology assures responders that they are retrieving a working AED<sup>2</sup>, but consider the benefit of an AED program manager which alerts you of anything that may affect device readiness – all automatically.
